Tactair Supplies Brake Control System for the Bell 525 Relentless

Paris Air Show, Le Bourget...Tactair Fluid Controls (*Hall 3A, Stand 117A*) a leading designer, manufacturer and supplier of fluid power and motion control products and systems, has been selected by Mecaer Aviation Group to supply the brake control system for the Bell 525 Relentless helicopter.

Tactair will supply the master cylinder based brake control system comprised of master cylinders, a park brake valve and reservoir for integration into the Bell 525 retractable landing gear.

Tactair Fluid Controls Inc. is a subsidiary of Young & Franklin Inc. of Liverpool, New York. Tactair designs and manufactures fluid power and motion control products for brake, landing gear, nose wheel steering, flight control, engine/nacelle control and utility control systems for fixed and rotary wing aircraft, naval service vehicles and land combat vehicles.
