

Quality Policy

Young & Franklin/Tactair Fluid Controls is a premier supplier of specialty fluid and electromechanical controls to the land-based gas turbine, aerospace and defense industries. We strive to provide our customers products that

- Are safe
- Are in compliance with applicable industry codes and standards
- Meet customer expectations for performance and reliability
- Maximize value

In cooperation with our employees and suppliers, we are committed to the continuous improvement of our products and our quality management system.

Peter Kaido

Vice President, Engineering & Quality
